AMENDMENTS TO THE SPECIFICATION

Please amend the title of the present application:

[[3.3B]] Wavelength Architecture And Implementation For Use With Photonically
Switched Network

Please amend the paragraph beginning on page 7, line 20 as follows:

Hence, according to an embodiment of the present invention to ensure that the upstream wavelength is both the correct wavelength and is of sufficient precision to enter the DWDM network, the ~~edge node~~ access node is provided with an optical carrier It is to modulate, from the central multi-lambda source 38 to 44.

Please amend the paragraph beginning on page 6, line 25 as follows:

One elementary instantiation of the access nodes 20 and 24 is shown in greater detail. With respect to access node 24 there is included therein [[demux]] demux 52 and [[mix]] mux 54 DWDM transponder 56 and 58 and electronic interfaces 60.
